

Coronavirus Testing with Baylor Genetics

From genetics to now, infectious diseases. Baylor Genetics is here to support you and your testing needs with our latest test for the novel coronavirus, COVID-19.

SARS-COV-2 RNA (COVID-19) DETECTION BY RT-PCR

Reverse Transcription Polymerase Chain Reaction

Diagnostics plays an important role in controlling the spread of COVID-19. Per the Centers for Disease Control and Prevention (CDC), the method used for our test is the standard for detecting if an individual is infected with the novel coronavirus, SARS-CoV-2.

The listed turnaround time is the usual amount of time from when a specimen is received within the laboratory and the result is available. Samples will be processed Monday - Saturday. Full details on sample collection and shipping instructions can be found on our website. For further assistance, please contact your BG rep or email us at help@baylorgenetics.com.

Turnaround Time:

- 24 - 48 hours

Accepted Sample Types:

- Nasal Swab
- Nasopharyngeal Swab
- Oropharyngeal Swab

Additional Features:

- Limit of detection: 8.00E-01 genomic RNA copies/μL
 - Our test is optimized to minimize the likelihood of false positive results.

WHY PARTNER WITH BAYLOR GENETICS?

When Baylor Genetics is the preferred send-out lab for COVID-19 testing, institutions and laboratories are able to partner with a diagnostic company that has fast test results, a high-throughput capacity, and state-of-the-art technology and lab facilities. By making testing accessible, our partners are able to reduce the risk of exposure to the virus for in-house employees and expand testing capacity.

Our goal with creating a test for COVID-19 is to bring accessibility and awareness to communities throughout our nation. With this goal, we can help institutions and clinics resume some type of normalcy, like elective surgeries and routine patient visits.

Furthermore, we understand each company is unique, which is why we offer tailored testing solutions to our partners. From sample collection to providing support after test results are sent out, Baylor Genetics is here to serve you, your team, and your patients throughout the entire testing process.

Benefits of partnering with Baylor Genetics:

- A CAP-accredited, CLIA-certified lab that can handle testing overflow
- A company with proper security measures to be HIPAA-compliant
- Electronic test results reported within 24-48 hours upon sample receipt
- Automatic reporting to city and state officials
- Sample pick-up services available in specified areas
- In-house, readily available test kits
- Online ordering and reporting portal

The Report:

- Reports can be delivered electronically
- Results may be positive, negative, or indeterminate
- Sample reports are available upon request
