

Coronavirus Testing with Baylor Genetics

From genetics to now, infectious diseases. Baylor Genetics is here to support you and your testing needs with our latest test for the novel coronavirus, COVID-19.

COVID-19 (SARS-CoV-2) RT-PCR TEST

Reverse Transcription Polymerase Chain Reaction

Diagnostics plays an important role in controlling the spread of COVID-19. Per the Centers for Disease Control and Prevention (CDC), our test is the standard for COVID-19 testing and provides an indication if an individual is infected with SARS-CoV-2.

Turnaround Time:

- 24 - 48 hours

Accepted Sample Types:

- Nasal Swab
- Nasopharyngeal Swab
- Oropharyngeal Swab

The listed turnaround time is the usual amount of time from when a specimen is received within the laboratory and the result is available. Samples will be processed Monday - Saturday. Full details on sample collection and shipping instructions can be found on our website. For further assistance, please contact your BG rep or email us at help@baylorgenetics.com.

WHY IS TESTING IMPORTANT?

Organizations can choose several different strategies for providing testing to their employees.

One approach is to offer testing to symptomatic employees and their contacts. By providing a safe, convenient, and rapid response to the illness of an employee, the company is being proactive in limiting the potential spread of the virus in the workplace. Another approach that a company could take is routine surveillance of their employees for the presence of the virus.

By testing employees, organizations are ensuring the health and safety of their employees and customers. Furthermore, this an opportunity for organizations to pave a way to help restore our nation back to health and work.

When an organization provides testing for its employees, the organization is:

- Taking necessary measures to remain productive and return back to some normalcy
- Providing the highest possible care to employees
- Lowering the risk of a workplace outbreak
- Supporting its employees' health and wellness
- Providing answers to employees that are unsure and test positive, allowing early treatment
- Reducing the impact of new infections within the world

WHY PARTNER WITH BAYLOR GENETICS?

For over 40 years, Baylor Genetics pioneered the history of genetic testing. Now, we're leading the way in the prevention and control of infection diseases. Our advanced technology and team's unmatched knowledge allow us to provide you and your team accurate results.

We understand that every organization is different, which is why every partnership we have is unique. No matter what the partnership looks like, know that BG is here to serve you and your team throughout the entire testing process – from sample collection to providing support after results are sent out.

Tailored testing solutions are available for:

- Healthcare Agencies
- Government Agencies
- Employer-Sponsored Testing
- Hospices
- Skilled Nursing Facilities
- Assisted Living Facilities

The Report:

- Reports can be delivered electronically
- Results may be positive, negative, or indeterminate
