By signing below, I hereby authorize Baylor Genetics to provide my insurance carrier any information necessary, including test results, for processing my insurance claim. I understand that I am responsible for any co-pay, co-insurance, and unmet deductible that the insurance policy dictates, as well as any amounts not paid by my insurance carrier for reasons including, but not limited to, non-covered and non-authorized services. I understand that I am responsible for sending Baylor Genetics any and all payments that I receive directly from my insurance company in payment for this test. Please note that Medicare does not cover routine screening tests.

Patient's Printed Name _____ Patient's Signature _____ Date (MM / DD / YYYY) _____

STATEMENT OF MEDICAL NECESSITY (REQUIRED)

This test is medically necessary for the risk assessment, diagnosis, or detection of a disease, illness, impairment, symptom, syndrome, or disorder. The results will determine my patient's medical management and treatment decisions. The person listed as the Ordering Physician is authorized by law to order the test(s) requested herein. I confirm that I have provided genetic testing information to the patient and they have consented to genetic testing.

Physician's Printed Name _____ Physician's Signature _____ Date (MM / DD / YYYY) _____

REFLEX TESTS

Reflex Request (Please describe below):

¹ For test code 9505: If sending FFPE slides, 20 slides are required for submission.
² For test code 9045: Test will be sent to LabPM for analysis and reporting.
³ For test code 9150: Please submit BOTH a source of tumor tissue (FFPE block/slides) AND a source of normal tissue (FFPE block/slides).
⁴ For test code 9070: If BCR-ABL1, Major (p210) is detected, reflex to 9065, and if BCR-ABL1, Minor (p190) is detected, reflex to 8972.

TUMOR ANALYSIS REQUISITION

SAMPLE SPECIFICATIONS TABLE

FOR CLIENT INFORMATION ONLY. Not required with sample submission.

ABBREVIATION	SAMPLE NAME	RECOMMENDED AMOUNT		SHIPPING INSTRUCTIONS	SPECIAL NOTES
		(2 YRS - ADULT)	(NEWBORN - 2YRS)		
BE	Blood in EDTA tube (purple-top)	3 - 5 cc	2 -3 cc	Ship at room or refrigerated temperature in an insulated container by overnight courier. Do not heat or freeze. Specimen should arrive in the laboratory within 24-48 hours of collection.	Attach clinical notes and concurrent laboratory reports (such as CBC, flow cytometry, cytogenetics, FISH, molecular testing, and pathology reports). Concurrent laboratory results may be sent later as soon as available.
BH	Blood in Sodium Heparin tube (green-top)	3 - 5 cc	2 -3 cc	Ship at room or refrigerated temperature in an insulated container by overnight courier. Do not heat or freeze. Specimen should arrive in the laboratory within 24-48 hours of collection.	Attach clinical notes and concurrent laboratory reports (such as CBC, flow cytometry, cytogenetics, FISH, molecular testing, and pathology reports). Concurrent laboratory results may be sent later as soon as available.
BME	Bone Marrow in EDTA tube (purple-top)	3 - 5 cc	2 -3 cc	Ship at room or refrigerated temperature in an insulated container by overnight courier. Do not heat or freeze. Specimen should arrive in the laboratory within 24-48 hours of collection.	Attach clinical notes and concurrent laboratory reports (such as CBC, flow cytometry, cytogenetics, FISH, molecular testing, and pathology reports). Concurrent laboratory results may be sent later as soon as available.
BMH	Bone Marrow in Sodium Heparin tube (green-top)	3 - 5 cc	2 -3 cc	Ship at room or refrigerated temperature in an insulated container by overnight courier. Do not heat or freeze. Specimen should arrive in the laboratory within 24-48 hours of collection.	Attach clinical notes and concurrent laboratory reports (such as CBC, flow cytometry, cytogenetics, FISH, molecular testing, and pathology reports). Concurrent laboratory results may be sent later as soon as available.
DNA	DNA, Extracted	At Least 100 ng	At Least 100 ng	Ship at room or refrigerated temperature in an insulated container by overnight courier. May also be shipped frozen on minimum of 10 lbs of dry ice in an insulated container by overnight courier.	Minimum concentration of 25ng/uL. Attach clinical notes, concurrent laboratory reports, and/or surgical pathology report, as applicable. Please send a corresponding representative H+E slide, if available.
FFPE	FFPE - Block	See Special Notes	See Special Notes	Ship at room temperature in an insulated container by overnight courier. If shipping during the summer months please include a cold-pack to avoid extreme temperatures. Do not heat or freeze.	Paraffin-embedded, formalin-fixed tissue block containing ≥20% tumor nuclei with a minimum tumor surface area of 5mm x 5mm (25mm ²). Decalcified specimens are not accepted. Surgical pathology report must be attached for all tissue samples.
FFPE	FFPE - Slides	See Special Notes	See Special Notes	Ship at room temperature in an insulated container by overnight courier. If shipping during the summer months please include a cold-pack to avoid extreme temperatures. Do not heat or freeze.	10 - 15 unstained 5µm FFPE slides containing ≥20% tumor nuclei with a minimum tumor surface area of 5mm x 5mm (25mm ²). For smaller specimens, 20 or more unstained 5µm FFPE slides containing ≥20% tumor nuclei should be submitted. Decalcified specimens are not accepted. Surgical pathology report must be attached for all tissue samples. For test codes 9505: 20 slides are required for submission.
RNA	RNA, Extracted	At Least 100 ng	At Least 100 ng	Ship frozen on minimum of 10 lbs of dry ice in an insulated container by overnight courier.	Minimum concentration of 25ng/uL. Attach clinical notes, concurrent laboratory reports, and/or surgical pathology report, as applicable. Please send a corresponding representative H+E slide, if available.
SA	Saliva	See Special Notes	See Special Notes	Ship at room temperature in an insulated container by overnight courier. Do not heat or freeze.	Collected with Oragene DNA Self-Collection Kit (provided by Baylor Genetics with instructions).
T	Fresh Frozen Tissue	150 mg	150 mg	Ship frozen on minimum of 10 lbs of dry ice in an insulated container by overnight courier.	Fresh tissue snap frozen at ≤-20°C. Store at ≤-20°C. Surgical pathology report must be attached for all tissue samples. Surgical pathology report may be sent later as soon as it becomes available. Please send a corresponding representative H+E slide, if available.
TM	Fresh Tissue in Medium	0.5 - 1 cm ³ or more	0.5 - 1 cm ³ or more	Ship at room or refrigerated temperature in an insulated container by overnight courier. Do not heat or freeze. Specimen should arrive in the laboratory within 48 hours of collection.	Transport tumor tissue in a sterile, screw-top container filled with tissue culture transport medium. If tissue culture transport medium is not available, collect in plain RPMI, Hanks solution, or saline. Surgical pathology report must be attached for all tissue samples. Surgical pathology report may be sent later as soon as it becomes available. Please send a corresponding representative H+E slide, if available.

INFORMED CONSENT FOR GENETIC TESTING

TEST INFORMATION

This consent form will provide you with information regarding genetic testing, which you should discuss with your healthcare provider or a genetic counselor. In order to ensure that you have understood the purpose and significance of genetic testing, we have provided information about the testing process and potential results below.

The purpose of genetic testing is to identify the cause of a suspected disease in you or your family. The testing analyzes your genetic material (DNA) for an abnormal change (variant) that could explain the disease you or members of your family are experiencing. Genetic testing can be a diagnostic test, which is used to identify or rule out a specific genetic condition. Genetic screening tests are used to assess the chance for a person to develop or have a child with a genetic condition. Genetic screening tests are not typically diagnostic, and results may require additional testing.

The purpose of this test is to see if you or your child may have a genetic variant or chromosome rearrangement. This may cause a genetic disorder or may determine the chance that you or your child will develop or pass on a genetic disorder in the future. "Your child" can also mean your unborn child, for the purposes of this consent.

In a genetic test, depending on the case, you can be tested for:

- A single gene/variant responsible for a specific, suspected genetic disease.
- Multiple genes in parallel.

The sample/specimen that is needed to perform the genetic test is stated in the test order form and is typically blood or purified DNA, but may also be tissue, saliva or buccal swab.

RESULTS

There are several categories of test results that may be reported including:

- **Positive:** Positive or "abnormal" results mean there is a change in the genetic material found that is related to your/your child's medical issues or that you/your child are at an increased risk of developing the disorder in the future. It is possible to test positive for more than one genetic variant.
- **Negative:** Negative or "normal" results mean no relevant genetic change related to your/your child's medical issues was detected. This does not mean there is no genetic change, but it may mean that the type of testing performed could not detect it.
- **Results of Unclear Significance:** Testing can detect change(s) in DNA which we do not yet fully understand. These alterations are also referred to as variants of uncertain significance (VUS). Additional studies may be recommended if a VUS is identified in a gene that may be associated with your/your child's medical concerns.
- **Secondary / Incidental Findings:** Testing can sometimes detect a change in a person's DNA unrelated to the reason for testing. If this change has medical or reproductive significance, it is called a secondary or incidental finding.

CONSIDERATIONS AND LIMITATIONS

- Results may indicate affected status, increased risk to someday be affected with, and/or reproductive risk for a genetic disorder. It is important to understand that genetic tests, even if negative, are not exhaustive. It is not possible to exclude risks for all possible genetic diseases for yourself and your family members.
- A positive test result is an indication that the individual(s) being tested may be predisposed to or have the specific disease or condition which prompted testing. You might consider additional independent testing, consult a personal physician, or pursue genetic counseling.
- It is possible that the knowledge of the test results may result in psychological stress for you and your family. It is always recommended to discuss the results with your healthcare provider or genetic counselor.
- If several family members are tested, the correct interpretation of the results depends on the provided relationships between family members. In rare cases, genetic testing can reveal that the true biological relationships in a family are not as they were reported. If a discrepancy is identified, it may be necessary to report this to the physician who ordered the testing.
- Genetic testing is highly accurate. Rarely, inaccurate results may occur for various reasons. These reasons include, but are not limited to, mislabeled samples, inaccurate reporting of clinical/medical information, or rare technical errors.
- If you sign this consent form, but you no longer wish to have your sample(s) tested, you can contact your physician to cancel the test. If testing is complete, but you have not received your results yet, you can inform your physician that you no longer wish to receive the results. If you withdraw consent for testing after 5pm CST the next business day following sample receipt by the laboratory, you will be charged for the full cost of the test.

PATIENT CONFIDENTIALITY AND SPECIMEN RETENTION

- Results will only be released to a licensed healthcare provider, to those allowed access to test results by law, and to those authorized in writing.
- In rare cases, persons with genetic diagnoses have experienced problems with insurance coverage and employment. The U.S. Federal Government has enacted several laws that prohibit discrimination based on genetic test results by health insurance companies and employers. In addition, these laws prohibit unauthorized disclosure of this information. For more information, you can visit www.genome.gov/10002077.
- Samples will be retained in the laboratory in accordance with the laboratory retention policy.
- After testing is complete, the de-identified submitted specimen may be used for test development and improvement, internal validation, quality assurance, and training purposes. DNA specimens are not returned to individuals or to referring health care providers unless specific prior arrangements have been made.

INFORMED CONSENT FOR GENETIC TESTING

PATIENT CONFIDENTIALITY AND SPECIMEN RETENTION (CONT.)

- Samples from residents of New York State will not be included in the de-identified research studies described in this authorization and will not be retained for more than 60 days after test completion, unless specifically authorized by your selection. No tests other than those authorized shall be performed on the biological sample.
- Information including results, indications for testing and clinical status obtained from this testing may be shared with healthcare providers, scientists and healthcare databases or used in scientific publications or presentations, but the personal identifying information of all persons studied will not be revealed in such data sharing or publications/presentations.

RESEARCH & RECONTACT CONSENT

For more information on research at Baylor Genetics, please visit baylorgenetics.com. Please read the below statements carefully and check the appropriate box.

Note: If left blank, consent is interpreted as "NO."

- I agree to use of my de-identified specimen for research to improve genetic testing for all patients and contribute to scientific research.
 - I am a New York State Resident, and I give Baylor Genetics permission to store my specimen in accordance to the laboratory retention policy for internal quality assurance and possible research studies.
- In addition to agreeing above, I agree to be contacted by Baylor Genetics regarding research opportunities.

PATIENT AUTHORIZATION

By signing this statement of consent, I acknowledge that I have read and understand the informed consent for genetic testing. I have received appropriate explanations from my physician regarding the purpose, scope, type and significance of the planned genetic testing and achievable results. All my questions have been answered and I have had the necessary time to make an informed decision about the genetic test.

I give permission to Baylor Genetics to conduct genetic testing as recommended by my physician.
