By signing below, I hereby authorize Baylor Genetics to provide my insurance carrier any information necessary, including test results, for processing my insurance claim. I understand that I am responsible for any co-pay, co-insurance, and unmet deductible that the insurance policy dictates, as well as any amounts not paid by my insurance carrier for reasons including, but not limited to, non-covered and non-authorized services. I understand that I am responsible for sending Baylor Genetics any and all payments that I receive directly from my insurance company in payment for this test. Please note that Medicare does not cover routine screening tests.

STATEMENT OF MEDICAL NECESSITY (REQUIRED)

This test is medically necessary for the risk assessment, diagnosis, or detection of a disease, illness, impairment, symptom, syndrome, or disorder. The results will determine my patient's medical management and treatment decisions. The person listed as the Ordering Physician is authorized by law to order the test(s) requested herein. I confirm that I have provided genetic testing information to the patient and they have consented to genetic testing.

PHENOTYPE INFORMATION (REQUIRED)

- YES** Phenotype has changed and I have included an updated clinical note and/or other documentation. (Please complete the "Indication for Testing" section.)
- NO** Phenotype has NOT changed. I have reviewed the phenotype information included in the clinical summary section of the WGS report and I agree this is currently accurate information.

INDICATION FOR TESTING (REQUIRED IF SELECTED "YES" FOR THE "PHENOTYPE INFORMATION" SECTION.)

Please provide the following clinical information regarding the patient to be tested. Please also submit a clinic note and pedigree, if available. Phenotypes listed are in HPO terms with the corresponding HPO number (<http://human-phenotype-ontology.github.io/>). This information is needed to facilitate interpretation of whole genome sequencing results. If the laboratory requires additional information, please indicate the health care provider to be contacted:

INFORMATION AND CONSENT FOR TESTING

FASTQ files generated from previous whole genome sequencing are analyzed with updated bioinformatics pipeline at Baylor Genetics. All variants, including those previously reported, will be interpreted with current knowledge, and updated clinical indications if provided. Clinical report will be issued listing variants that are highly likely to provide diagnosis to the patients. Variants in the original report may be removed in the updated report due to variant re-classification into benign/likely benign, or variant no longer considered likely to be the diagnosis for the patient. The healthcare provider ordering reanalysis is responsible for comparison of the content of the original report and the reanalysis report in the context of genetic counseling.

Patient's preference of the medical actionable findings and carrier findings is presumed to be unchanged, unless indicated in a new consent form submitted with the reanalysis order.
