By signing below, I hereby authorize Baylor Genetics to provide my insurance carrier any information necessary, including test results, for processing my insurance claim. I understand that I am responsible for any co-pay, co-insurance, and unmet deductible that the insurance policy dictates. If self-pay is selected, I agree to pay for the cost of testing ordered and billed by Baylor Genetics as outlined in the Good Faith Estimate I received. I understand that I am responsible for sending Baylor Genetics any and all payments that I receive directly from my insurance company in payment for this test. Please note, Medicare may not cover certain screening tests.

## WHOLE EXOME SEQUENCING (WES) REQUISITION

Patient Last Name \_\_\_\_\_ Patient First Name \_\_\_\_\_ MI \_\_\_\_\_ Date of Birth (MM / DD / YYYY) \_\_\_\_\_ Genetic Sex \_\_\_\_\_

### STATEMENT OF MEDICAL NECESSITY AND CONSENT TO TERMS & CONDITIONS FOR TEST ORDER (REQUIRED)

This requisition hereby incorporates the Terms and Conditions of the Laboratory Services found at <https://www.baylorgenetics.com/lab-terms-conditions/> or, in the case of international entities, <https://www.baylorgenetics.com/terms-conditions-of-the-laboratory-services-international/>. This test is medically necessary for the risk assessment, diagnosis, or detection of a disease, illness, impairment, symptom, syndrome, or disorder. The results will determine my patient's medical management and treatment decisions. The person listed as the Ordering Physician is authorized by law to order the test(s) requested herein. I confirm that I have provided genetic testing information to the patient, and they have consented to genetic testing.

Physician's Printed Name \_\_\_\_\_ Physician's Signature \_\_\_\_\_ Date (MM / DD / YYYY) \_\_\_\_\_

### INSTRUCTIONS FOR ORDERING

Familial samples are required for non-Proband WES. Please contact the laboratory if placing a test order where the comparator(s) are different than the required family members listed.

For select cases as determined by Baylor Genetics, WES may be supplemented by RNA Sequencing (RNA-Seq) to aid with variant classification as a standard part of this test offering. If the originally submitted specimen is blood and meets all established specimen requirements, RNA-Seq will be reflexively performed without additional authorization. If these requirements are not met, submission of a new blood specimen may be requested, or reflexive testing may not be performed. A final report will be issued prior to initiating RNA-Seq. Any updates resulting from this additional technology will be provided through an addended report.

### STANDARD WES TEST OPTIONS

- 1500 Proband Whole Exome Sequencing
- 1603 Duo Whole Exome Sequencing
- 1600 Trio Whole Exome Sequencing
- 1604 Quad Whole Exome Sequencing

Acceptable sample types for standard WES testing options include: blood in EDTA (purple-top), extracted DNA, cultured skin fibroblast, buccal swab, saliva, cord blood collected at or after birth, and skin biopsy.

CORRESPONDING COMPARATOR TESTS  
(Both Biological Parents Are Required)

- 1550 Comparator WES  
 Maternal  Paternal
- 1602 Comparator Control  
 Maternal  Paternal

CORRESPONDING COMPARATOR TESTS  
(Both Biological Parents + One Additional Family Member Are Required)

- 1550 Comparator WES  
 Maternal  Paternal
- 1602 Comparator WES  
 Sibling  Child
- Maternal:  Half-Sibling  Aunt/Uncle  
 Grandparent  First Cousin
- Paternal:  Half-Sibling  Aunt/Uncle  
 Grandparent  First Cousin

### RAPID WES TEST OPTIONS

**Note:** Rapid Whole Exome Sequencing testing options are available exclusively under institutional billing or self-pay pricing. Insurance billing is not offered.

- 1729 Rapid Proband Whole Exome Sequencing
- 1723 Rapid Duo Whole Exome Sequencing
- 1722 Rapid Trio Whole Exome Sequencing
- 1724 Rapid Quad Whole Exome Sequencing

Acceptable sample types for Rapid WES testing options include: blood in EDTA (purple-top), extracted DNA, buccal swab, and cord blood collected at or after birth.

CORRESPONDING COMPARATOR TESTS  
(Both Biological Parents + One Additional Family Member Are Required)

- 1550 Comparator WES  
 Maternal  Paternal
- 6997 Comparator Control  
 Maternal  Paternal
- 1550 Comparator WES  
 Maternal  Paternal
- 1550 Comparator WES  
 Sibling  Child
- Maternal:  Half-Sibling  Aunt/Uncle  
 Grandparent  First Cousin
- Paternal:  Half-Sibling  Aunt/Uncle  
 Grandparent  First Cousin

### ADD-ON TESTS

- 4900 Global Metabolomic Assisted Pathway Screen - Plasma from EDTA  
Was plasma extracted from EDTA?  Yes  No
- 4901 Global Metabolomic Assisted Pathway Screen - Urine
- 8665 Chromosomal Microarray Analysis (CMA)-HR+SNP Screen (Comprehensive)
- 2055 Comprehensive mtDNA analysis by NGS
- 9815 Exome Raw Data Release

**Note:** Any combination of Chromosomal Microarray Analysis (CMA), mtDNA Analysis, or Global MAPS® can be ordered along with a WES test, however the turnaround time for results will differ from exome sequencing.

**WHOLE EXOME SEQUENCING (WES) REQUISITION**

Patient Last Name \_\_\_\_\_ Patient First Name \_\_\_\_\_ MI \_\_\_\_\_ Date of Birth (MM / DD / YYYY) \_\_\_\_\_ Genetic Sex \_\_\_\_\_

**ADDITIONAL REPORTING OPTIONS**

If a box is not checked the lab will default to No / Not Report.

**Option for Reporting of ACMG Secondary Findings**

Variants in genes included in the ACMG secondary findings guidelines will be reported for each family member marked below. Each marked family member will receive their own report on these findings.

- 
- Proband
- 
- Mother
- 
- Father
- 
- Other Family Member

**Option for Reporting of Incidental Findings**

Pathogenic and likely pathogenic variants in genes covered under Category II of the Incidental Findings section of the consent form will be reported.

- 
- Please report pathogenic and likely pathogenic variants in genes associated with Incidental Findings.

**Trio and Quad Orders with Both Parents Only – Option for Reporting of Research Findings**

For variants in genes with no known disease association, these variants will be reported if biallelic or de novo.

- 
- Please report biallelic and de novo variants in genes with no known disease association.

**PROBAND SAMPLE(S)**

 Please refer to [www.baylorgenetics.com](http://www.baylorgenetics.com) for full sample requirements.

**Note:** Acceptable sample types for Rapid Whole Exome Sequencing test options include cord blood collected at or after birth, extracted DNA, blood in EDTA (purple-top), and buccal swab.

- |  |  |                                       |  |
|--|--|---------------------------------------|--|
| <input type="radio"/> Blood in EDTA (preferred)                | <input type="radio"/> Saliva                   | mtDNA analysis only                   | Global MAPS® only  |
| <input type="radio"/> Buccal Swab                              | <input type="radio"/> Skin Biopsy*             | <input type="radio"/> Skeletal Muscle | <input type="radio"/> Plasma from EDTA <input type="radio"/> Urine |
| <input type="radio"/> Cord Blood (collected at or after birth) | <input type="radio"/> Extracted DNA from _____ | <input type="radio"/> Liver           | _____ / _____ / _____  |
| <input type="radio"/> Cultured Skin Fibroblast                 |  | <input type="radio"/> Tissue          | Date of Collection (MM / DD / YYYY)                                |

**NOTE:** Extracted DNA/RNA will only be accepted if the isolation of nucleic acids for clinical testing occurs in a CLIA-certified laboratory or a laboratory meeting equivalent requirements as determined by the CAP and/or the CMS.

**COMPARATOR INFORMATION**

Comparator	Last Name	First Name	Genetic Sex	Date of Birth (MM / DD / YYYY)	Date of Collection (MM / DD / YYYY)	Sample Type	Symptomatic? (Attach summary of findings if Yes)
<b>Maternal</b>			/ /	____/____/____	____/____/____	<input type="radio"/> Blood in EDTA (preferred) <input type="radio"/> Buccal Swab <input type="radio"/> Saliva	<input type="radio"/> Yes <input type="radio"/> No
<b>Paternal</b>			/ /	____/____/____	____/____/____	<input type="radio"/> Blood in EDTA (preferred) <input type="radio"/> Buccal Swab <input type="radio"/> Saliva	<input type="radio"/> Yes <input type="radio"/> No
<b>Other Family Member:</b> <input type="radio"/> Sibling <input type="radio"/> Child  <b>Maternal</b> <input type="radio"/> Half-Sibling <input type="radio"/> Aunt/Uncle <input type="radio"/> Grandparent <input type="radio"/> First Cousin  <b>Paternal</b> <input type="radio"/> Half-Sibling <input type="radio"/> Aunt/Uncle <input type="radio"/> Grandparent <input type="radio"/> First Cousin			<input type="radio"/> Female <input type="radio"/> Male	____/____/____	____/____/____	<input type="radio"/> Blood in EDTA (preferred) <input type="radio"/> Buccal Swab <input type="radio"/> Saliva	<input type="radio"/> Yes <input type="radio"/> No

 \* This sample type incurs an additional fee and typically adds 14 days to the turnaround time, depending on sample quality.  
 † Baylor Genetics will store this sample for up to 14 days after the report is issued, allowing for follow-up testing if needed.

## INFORMED CONSENT FOR WHOLE EXOME SEQUENCING (WES)

For the purposes of this consent, "you", "me", "my", and "I" can also mean your child (including unborn child) or the individual you are the personal representative for.

\_\_\_\_\_  
Patient Last Name                      Patient First Name                      MI                      Date of Birth (MM / DD / YYYY)                      Genetic Sex

### WHOLE EXOME SEQUENCING (WES) AND WHOLE EXOME SEQUENCING (WES) CONSENT

This consent form can only be used for whole exome sequencing and Whole Exome Sequencing. Consent forms for other tests are located at Baylor Genetics' website (<https://www.baylorgenetics.com/consent/>).

For the purposes of this consent, "I", "my", "you", and "your" can refer to you, your child, your unborn child, or other individual you are the legal representative of.

### TEST INFORMATION

Your healthcare provider (doctor, genetic counselor, or other person with medical training) wants to order a genetic test called Whole Exome Sequencing (WES) or Whole Exome Sequencing (WES). These tests look for changes, called variants, in a person's DNA that can cause health issues. DNA is our genetic material. These variants can be in certain genes, specific parts of our DNA that are needed for our health. They can also be found in other places in the genome (all DNA that a person has). Based on your known health issues, variants in your DNA that may cause these issues will be reported. This test may explain your health issues. It may also explain health issues that your family may have. Even if this test finds the cause of your health issues, this may not help treat or manage those issues.

Testing where your DNA is compared to one or more family members may be performed. This may help better understand your results or show if your family members have the same variant as you.

Before you sign this consent form, you should speak with your healthcare provider. They can help you understand this testing and what it means for your health.

### TEST RESULTS

There are several types of test results that may be reported including:

- **Positive:** A variant in the DNA was found that is related to your health issues or a health issue that you are at an increased risk of having in the future. These changes that cause disease are also known as pathogenic variants.
- **Negative:** No variants in the DNA were found that are related to your health issues or that would increase your risk of a health issue in the future.
- **Variant of Uncertain Clinical Significance (VUS):** A variant in the DNA was found that we do not know its effect, if any, on health. More testing may be needed for you or your family if a VUS is found that may be associated with your health issues.
- **Secondary and Incidental Findings (Optional):** Testing can sometimes find a variant in the DNA not related to the reason for testing but can change your medical care. **Note:** Certain issues within the brain start in adulthood and get worse over time (neurodegenerative). They often have no cure or treatment. By default, these variants will not be reported unless they are related to your health issues. However, variants in one or more of these gene(s) can be requested if needed. Your provider must write each gene needed in your test order.
- **Genes of No Known Disease Association (Optional):** Testing may find a variant in a gene that is not known to cause disease. This may be helpful to learn more about these genes in the future. These results do not currently impact medical management or indicate a diagnosis.

### SECONDARY AND INCIDENTAL FINDINGS

The following categories of variants are not expected to cause your current health issues. However, they can each be requested to be reported. Knowing about these variants might affect your future medical care.

- **ACMG Secondary Findings:** The American College of Medical Genetics and Genomics (ACMG) recommends reporting disease-causing variants in certain genes that cause health issues. Each family member can request this group of variants to be reported.
- **Incidental Findings:** Other variants known to cause health issues but that are not causing your current health issues.

### CONSIDERATIONS AND LIMITATIONS

- You should speak with your provider before signing this consent form to understand the risks, benefits, and alternatives to testing.
- Testing may show you have, or are at increased chance of having, a health issue. It may show that you have an increased chance of having a child with a health issue.
- Even if the variant(s) causing your health issues are found, how these issues might progress or improve with treatment might not be known. Affected family members with the same variant might not be affected like you are.
- Depending on the results of testing, more testing may be needed to understand these results. This testing might be needed for you and/or other family members.
- A negative result does not rule out the chance for health issues. Our knowledge of variants and how they cause disease may change over time as we learn more about genetics. Testing has limitations to what it can find as well.
- Certain factors may lead to incorrect results. These include mislabeled samples, incorrect information in the test order, and rare technical errors.
- More sample may be needed from you if the first sample is not sufficient to complete testing.

### USE OF DATA AND SPECIMEN FOR RESEARCH PURPOSES

Biological specimens, test results, and associated information may be used by Baylor Genetics and its research partners for anonymous or coded research purposes, including improving genetic testing, advancing knowledge of genetic conditions, and developing new technologies, including inclusion in de-identified clinical databases, only with the patient's informed consent. Patient data and specimen will not be used for anonymous or coded research, unless authorized by marking below. A patient's decision to decline participation shall not affect their ability to receive testing from Baylor Genetics.

For Oregon patients, please consult the state specific consent form found at [www.baylorgenetics.com/forms](http://www.baylorgenetics.com/forms).

I authorize Baylor Genetics the use of my specimen and de-identified data for research.

### FOR SAMPLES FROM NEW YORK STATE RESIDENTS

Samples from New York State residents shall not be included in research without written consent. Samples will not be retained for more than sixty (60) days after receipt by Baylor Genetics, unless authorized by marking below. No tests other than those authorized shall be performed on the samples.

I authorize Baylor Genetics to retain sample(s) longer based on our retention policy for test development, quality assurance, and training purposes.

**INFORMED CONSENT FOR WHOLE EXOME SEQUENCING (WES)**

For the purposes of this consent, "you", "me", "my", and "I" can also mean your child (including unborn child) or the individual you are the personal representative for.

Patient Last Name	Patient First Name	MI	Date of Birth (MM / DD / YYYY)	Genetic Sex
-------------------	--------------------	----	--------------------------------	-------------

**PATIENT CONFIDENTIALITY AND SAMPLE RETENTION**

- If several family members are tested, knowing the correct biological relationships among them is important. In rare cases, testing can show that family members are not related as expected. If this is found, we may contact the provider who ordered your testing.
- If this testing is requested to be cancelled after the order and sample are sent to the laboratory, please see our Test Cancellation Policy at [www.baylorgenetics.com/cancel-test/](http://www.baylorgenetics.com/cancel-test/).

**PATIENT CONFIDENTIALITY AND SAMPLE RETENTION (CONTINUED)**

- Only Baylor Genetics and its contracted partners will have access to your sample for the ordered testing. Results from testing will only be released to: (i) a licensed healthcare provider, (ii) those authorized in writing, (iii) the patient or their personal representative, and (iv) those allowed access to test results by law. You have the right to access your test results from Baylor Genetics by providing a written request. You also have the right to request raw data obtained from your sample by providing a written request or HIPAA Authorization Form.
- In rare cases, people with genetic diseases may have problems with health insurance and employment. The U.S. Federal Government has several laws that prohibit discrimination based on test results by health insurance companies and employers. These laws also prohibit unauthorized disclosure of this information. For more information, please visit [www.genome.gov/10002077](http://www.genome.gov/10002077).
- Samples will be kept in the laboratory based on our retention policy. Once testing is completed, the de-identified sample may be used for test development, quality assurance, and training purposes. Samples are not returned to patients or providers unless requested prior to testing. You and your heirs will not receive payments, benefits, or rights to any resulting products or discoveries.
- The information from your testing may be used in scientific research, publications or presentations, but your specific identity will not be revealed. We may contact your provider to obtain more clinical information about you. Baylor Genetics also performs other types of scientific research and may contact you to see if you would like to be involved.
- Variants found may be submitted to databases. The medical community uses these databases to collect information about how variants might cause disease to improve testing and treatment for patients. An example is ClinVar, a free, public archive of reports on human genetics. Limited clinical information may need to be shared with these databases. In rare cases, this information may be enough to allow you or your family members to be identified.
- For more information on privacy practices at Baylor Genetics, please visit [www.baylorgenetics.com/privacy-practices/](http://www.baylorgenetics.com/privacy-practices/).

**FINANCIAL AGREEMENT**

By signing below, I hereby authorize Baylor Genetics to provide my insurance carrier any information necessary, including test results, for processing my insurance claim. I understand that I am responsible for any co-pay, co-insurance, and unmet deductible that the insurance policy dictates. I designate Baylor Genetics as my designated representative for purposes of appealing any denial of benefits by my insurance carrier. I irrevocably assign associated payment to Baylor Genetics, and direct that payment be made directly to Baylor Genetics. Please note, some payers may not cover certain screening tests.

If my health insurer does not cover the test or I do not have health insurance, I have received a good faith estimate of the cost for the genetic testing ordered by my provider and agree to pay for the cost of the genetic testing billed to me by Baylor Genetics based on that good faith estimate. More information is available in Baylor Genetics' No Surprises Act and Good Faith Estimate Notice located at <https://www.baylorgenetics.com/no-surprises-act/>.

A Medicare Advance Beneficiary Notice (ABN) is required for services Medicare identifies as not medically necessary.

**PATIENT AUTHORIZATION**

By signing this statement of consent, I acknowledge that I have read, understand, and hereby grant my informed consent for genetic testing. I have received appropriate explanations from my healthcare provider about the planned genetic test(s) and possible results. I have been informed by my healthcare provider about the availability and importance of genetic counseling and have been provided with written information identifying a genetic counselor or medical geneticist who can provide such counseling services. All my questions have been answered, and I have had the necessary time to make an informed decision about the genetic test(s).

**Note: If Prenatal WES was ordered, please leave the Patient section blank and complete only a section for each relative tested below.**

I hereby give permission to Baylor Genetics to conduct genetic testing as recommended by my healthcare provider.\*

Patient Name	Patient Signature	Date Signed (MM / DD / YYYY)
--------------	-------------------	------------------------------

Relationship to Patient	Name	Signature	Date
Relative 1	_____	_____	_____
Relative 2	_____	_____	_____
Relative 3	_____	_____	_____

**If one or more family members have a Representative signing on their behalf:**

Name	Signature	Date (MM / DD / YYYY)	Representative For	Relationship to Represented Person(s)
------	-----------	-----------------------	--------------------	---------------------------------------

\*If you are signing on behalf of the patient as the parent(s) and/or person with legal authority to act on behalf of the patient or parent, you may be required to provide evidence of your authority.

**INFORMED CONSENT FOR WHOLE EXOME SEQUENCING (WES)**

For the purposes of this consent, "you", "me", "my", and "I" can also mean your child (including unborn child) or the individual you are the personal representative for.

\_\_\_\_\_  
Patient Last Name      Patient First Name      MI      Date of Birth (MM / DD / YYYY)      Genetic Sex

**FOR SURROGATES PREGNANCIES – FOR PRENATAL WES ONLY:**

Maternal cell contamination (MCC) studies use blood or another sample from a pregnant person. MCC studies are used to determine that the sample being tested belongs to the fetus and not the pregnant person. The results of MCC studies are not used for the treatment or management of the fetus, pregnant person, or other individuals, and are not part of the pregnant person's designated medical record.

I hereby give permission for my sample to be used for MCC studies:

\_\_\_\_\_

**A. Ordering Physician Name:** \_\_\_\_\_

**B. Patient Name:** \_\_\_\_\_ **C. Identification Number:** \_\_\_\_\_

## Advance Beneficiary Notice of Non-coverage (ABN)

**NOTE: If Medicare doesn't pay for a Baylor Genetics test below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for one or more of the **Baylor Genetics test(s)** below.

D. Laboratory Tests	E. Reason Medicare May Not Pay:	F. Estimated Cost
Duo Whole Exome Sequencing	Medicare does not pay for this test for your condition.	\$2,400
Trio Whole Exome Sequencing		\$2,400
Quad Whole Exome Sequencing		\$2,400
Proband WES		\$1,800
Global Metabolomic Assisted Pathway Screen – Plasma from EDTA		\$1,000
Global Metabolomic Assisted Pathway Screen – Urine		\$1,000

**WHAT YOU NEED TO DO NOW:**

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the **Baylor Genetics test** listed above.

**Note:** If you choose Option 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

<b>G. OPTIONS: Check only one box. We cannot choose a box for you.</b>
<input type="checkbox"/> <b>OPTION 1.</b> I want the <b>Baylor Genetics Test</b> listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but I can appeal to Medicare by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.
<input type="checkbox"/> <b>OPTION 2.</b> I want the <b>Baylor Genetics Test</b> listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. I cannot appeal if Medicare is not billed.
<input type="checkbox"/> <b>OPTION 3.</b> I don't want the <b>Baylor Genetics Test</b> listed above. I understand with this choice I am <b>not</b> responsible for payment, and I cannot appeal to see if Medicare would pay.

**H. Additional Information:**

**This notice gives our opinion, not an official Medicare decision.** If you have other questions on this notice or Medicare billing, call **1-800-MEDICARE** (1-800-633-4227/TTY: 1-877-486-2048).

Signing below means that you have received and understand this notice. You may ask to receive a copy.

<b>I. Signature:</b>	<b>J. Date:</b>
